An Online COVID-19 Conspiracy Theory, My Position Regarding Discussing Supporting And Promoting Questionable Conspiracy Theories, Beware Of The Spirit Of Fear, My Personal Health Situation, My Doctor-Patient Relationship And Why It Ended, My Personal View Regarding Modern Medicine And Pharmaceutical Industry, My Understanding And Compassion Towards People Who Are Required To Take Medications To Stay Alive, My Research Regarding COVID Vaccines, How I View The U.S. Military COVID Conspiracy Theory, Our Primary Job Is To Preach The Christian Gospel To The Lost And To Speak Positive Things To The World, Some Closing Remarks, BBB Suggested Reading List

Recently, while browsing my Facebook news feed, I came across a certain individual who made a rather controversial comment concerning the COVID vaccines which stated the following:

----- Begin quote -----

"The Virus and the Vax are both bio-weapons and our military has been in charge of getting a needle in every arm since the very beginning."

----- End Quote -----

Before sharing my personal thoughts regarding this matter, let me begin by sharing the following information concerning myself so that my readers fully understand my background. As a Bible-believing Christian, I have always strived to remain clear of unsubstantiated conspiracy theories. After all, my job as an online Christian evangelist is to share Biblical truth, and things which will spiritually feed, inspire and lift up my Christian brethren. My job is NOT to support or to promote questionable conspiracy theories which sow doubts, fear and apprehension. After all, as the Prophet Isaiah, the Apostles John and Paul and other Bible authors wrote:

"For God hath not given us the spirit of fear; but of power,

and of love, and of a sound mind."

2 Timothy 1:7, KJV

"There is no fear in love; but perfect love casteth out fear: because fear hath torment. He that feareth is not made perfect in love."

1 John 4:18, KJV

"Thou wilt keep him in perfect peace, whose mind is stayed on thee: because he trusteth in thee."

Isaiah 26:3, KJV

"Fear thou not; for I am with thee: be not dismayed; for I am thy God: I will strengthen thee; yea, I will help thee; yea, I will uphold thee with the right hand of my righteousness."

Isaiah 41:10, KJV

"Peace I leave with you, my peace I give unto you: not as the world giveth, give I unto you. Let not your heart be troubled, neither let it be afraid."

John 14:27, KJV

"Great peace have they which love thy law: and nothing shall offend them."

Psalms 119:165, KJV

"And the peace of God, which passeth all understanding, shall keep your hearts and minds through Christ Jesus."

Philippians 4:7, KJV

"And fear not them which kill the body, but are not able to kill the soul: but rather fear him which is able to destroy both soul and body in hell."

Matthew 10:28, KJV

"So that we may boldly say, The Lord is my helper, and I will not fear what man shall do unto me."

Hebrews 13:6, KJV

"The angel of the LORD encampeth round about them that fear him, and delivereth them."

Psalms 34:7, KJV

So if the children of the world want to promote that kind of fear-inducing, questionable nonsense, that is entirely up to them. But as for you and I, our very first responsibility as Bible-believing Christians is to promote and share God's Word

which engenders faith, peace and trust in the Lord. So having now shared the above with you, please consider the following facts regarding myself and my personal health situation:

- * I am approaching 73 years of age as of the original publication date of this article.
- * I have NOT been vaccinated/immunized against anything in over 60 years since I was in elementary school.
- * I do NOT get annual flu shots.
- * I have never received a single COVID jab despite the pressure to do so.
- * I do NOT take any vitamin supplements.
- * I do NOT take any OTC meds such as Tylenol, Aspirin or Ibuprofen. In fact, I don't even keep any in my medicine cabinet, which some people would probably find somewhat weird.
- * I abandoned my last doctor three years ago because I no longer desired to be his lifelong customer by allowing him to induce me to take an increasing number of medications. Does that sound familiar to any of you?

It may interest some of my readers to know that from the time that I first arrived on Guam in 1986, and up until 2017 -- or a thirty-one year period -- I did NOT have a regular personal physician. Furthermore, other than taking care of dental problems, and seeing a doctor a few times for my back problems -- kyphosis, or a curved spine -- I did NOT regularly visit a doctor's office. As I have said on a few previous occasions, I am simply not the type of person who automatically runs to a doctor for every cough and sniffle. I simply hunker down and endure it until it passes. In years past I may have taken an OTC medication -- over the counter meds -- such as Tylenol or Ibuprofen, but that was about it, besides pain meds following many dental extractions. I am now toothless.

Then, as I have related before, in 2017, and then again in 2018, I had very serious occurrences of DVT. That's to say, Deep Vein Thrombosis. My situation in 2018 was made a lot worse due to the fact that the DVT graduated to a serious case of Acute Bilateral Pulmonary Embolism. For my readers

who may not be familiar with these terms, DVT occurs when blood clots form in one's legs, thus severely restricting the flow of blood. It can be very painful, and can result in swollen legs and feet. This can make it very difficult -- if not impossible -- to walk. Such was what happened to me.

Regarding Acute Bilateral Pulmonary Embolism, what is also dangerous regarding DVT is that the blood clots can break off and travel to one's lungs, heart or brain, which could result in a quick death. In my particular case, according to my doctor at that time, blood clots had traveled to all three lobes of my lung, which made breathing difficult and painful. In fact, when I was admitted to the hospital, they at first assumed that I was in the middle of having a major heart attack, which proved not to be the case.

My first hospital in 2017 resulted in an eleven-day stay, because I was simply unable to walk. My second 2018 stay was considerably shorter, being only a five-day stay, even though it was during that second visit that the multiple emboli were discovered in my lung. I assume it was my right light. The end result is that I began seeing a doctor on a regular basis for the first time in thirty-one years, and I was put on an anticoagulant -- or so-called blood-thinner -- for life, being as this was my second episode with DVT. At that time, it was Warfarin, which is a pretty cheap drug.

While I liked my doctor, and had a good rapport with him -- he was an elderly gentleman from the Philippines -- over a six-year period that I saw him -- up until 2023 -- I began to realize how he tended to operate. First he recommended that I begin taking Levothyroxine sodium for hypothyroidism. This is a condition where the thyroid gland does not produce enough hormone. Symptoms can include fatigue, weight gain, and a number of other things. But then he wanted me to take a statin for my high cholesterol level, and it went on from there. It seemed that every time he found something in my lab charts that was outside acceptable medical norms. his solution was automatically for me to take yet another drug.

Well, by my last year with him, after several attempts, he convinced me to switch from the cheap Warfarin to the much more expensive Xarelto, which can cost from around \$500 to \$600 for a one-month supply without insurance. Thankfully, my insurance did cover it. However, by this time, as nice as my doctor was, I was on to his game and strategy. Thus,

in 2023 I dropped him, and I haven't seen a doctor, or take any medications since. I have basically gone back to what I was doing for the first thirty-one years that I was here, and I have no regrets at all. I feel good about no longer putting any man-made medications in my body.

In short, my view is that our bodies are poisoned enough each day through the food that we eat, the water that we drink, the air that we breath, the clothes that we wear, the household chemicals that we often use, etc. So that being the case, why poison ourselves even further through vaccines, flu shots and medications which could possibly have unknown, or as-of-yet unseen, negative side effects on our bodies? Yet, despite potential negative outcomes, this is precisely what so many of the corrupt and cozy doctor-pharmaceutical industry arrangements try to get us to do. Right? Some of them don't really want to make us better or improve our general health. They just view us as cash cows to fill up their coffers.

Now, please understand that by saying these things, I am most certainly not criticizing or putting down anyone who has a particular illness which requires them to take a particular medication just to stay alive. For example, millions of diabetics have no choice but to take insulin on a daily basis. More specifically, as shocking as it may be, as of early 2026, there are over forty million Americans who suffer from diabetes. About 90%–95% suffer from Type 2 diabetes, while over 1.5 million Americans live with type 1 diabetes. This number includes roughly 314,000 children and adolescents. How sad!

So I am obviously not going to look down on these people simply because they are forced to take insulin in order to remain alive. We must each live and act according to our personal degree of faith, right? At any rate at almost 73 years of age, my health is obviously not perfect. Trust me when I say that I do have my share of bodily afflictions. However, it is my view that my personal situation could be a lot worse if I was still taking all of that junk which may do who-knows-what to my body over time. You need to understand that some negative side affects occur quickly, while others slowly build up over time, or even appear quite suddenly and unexpectedly.

My point is this. When it comes to COVID-19 and the COVID vaccine jabs, I am not naive and gullible. As such, I did

engage in due diligence, and I conducted my own level of personal research -- such as utilizing the VAERS website -- and I arrived at the conclusion that the COVID jabs were not safe. Furthermore, it may interest you to know that my not taking the jabs in fact resulted in my paying a high price with regard to my relationship with my own family members. I won't go into the specific details due to some privacy concerns, and also because it is too heartbreaking.

Nevertheless, I find the aforementioned conspiracy theory regarding the US military both fantastical and very hard to believe. Whether or not COVID and the vaccines were really designed as bio-weapons by the Chinese at Wuhan, or by the US military -- I am aware of both theories -- that part I can accept. However, what I find very difficult to accept is that the US military specifically designed COVID and the vaccines to use against the American people for the purpose of population reduction.

This very thought is so antithetical to the mission of the US military, which is to preserve and protect America and the American people against all enemies both foreign and domestic. Thus, in my view, the US military turning against the American people, or supposedly being ordered to do so by Klaus Schwab and the World Economic Forum, or by Bill Gates, or by Barack Obama, or by anyone else which certain minds dream up, makes absolutely no sense whatsoever. As far as I know, the US military does NOT take orders from foreign entities. Their loyalty is to the United States and to the American people first and foremost.

Furthermore, rare are the instances when the US military has violently turned on American citizens. I am reminded of the 1970 Kent State incident which involved the National Guard killing about four people as I vaguely recall. Having said that, I have to believe that as patriots who are sworn to protect American citizens, there's still enough goodness in the US military that they would NOT ever betray the trust of the American people in such an evil fashion -- as described by the aforementioned conspiracy theorist -- so as to have the specific goal of jabbing every single arm as this person claims. Now, if you believe otherwise, you are welcome to try to convince me that I'm wrong. Have fun with that!

In conclusion, and to reiterate one of my key points, it is my firm, personal conviction that our primary responsibility and obligation as online Christians is to share Biblical

truth, and things which will spiritually feed, inspire and lift up my Christian brethren. We are to share good things and positive things as the Apostle Paul wrote. It is most certainly NOT to support or to promote often questionable, unsubstantiated conspiracy theories which sow doubts, fear and apprehension which serve no positive purpose. As Paul wrote in his Epistle to the brethren at Philippi:

"Finally, brethren, whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and if there be any praise, think on these things."

Philippians 4:8, KJV

With these thoughts, I will bring this article to a close. It is my hope that you've found it informative and enlightening, and I pray that it has been a blessing in your life as well. If you have an account with Facebook, Twitter, Tumblr or with any other social network, I would really appreciate if you'd take the time to click or tap on the corresponding link that is found on this page. Thanks so much, and may God bless you abundantly!
